

# All Phase 20

**Versatile top-dress  
 for balanced nutrition**

pelleted

A Kentucky Equine Research Formulated Feed

*Fortified with Brooks exclusive  
**Oxiguard** system of natural source  
 Vitamin E and organic selenium!*

*Bioavailable Vitamin E and organic selenium  
 work synergistically as effective antioxidants to  
 minimize muscle soreness and fatigue.*

*Our commitment to quality  
 drug free manufacturing is  
 your satisfaction guarantee!*

## Guaranteed Analysis

Crude Protein (min.)	20 %
Crude Fat (min.)	4.5 %
Crude Fibre (max.)	7.5 %
Calcium (act.)	2.0 %
Phosphorus (act.)	1.2 %
Potassium (act.)	1.25 %
Manganese (act.)	275 ppm.
Copper (act.)	133 ppm.
Zinc (act.)	400 ppm.
Sodium (act.)	1.2 %
Vitamin A (min.)	36500 IU/KG.
Vitamin D (min.)	3500 IU/KG.
Vitamin E (min.)	675 IU/KG.
Selenium (min. added)	1.5 ppm.

❖ *NSC level (reduced)*

## Features and Benefits of All Phase 20

**Formulated with high quality protein, vitamins, and chelated (organic) minerals.**

*Supplies nutritional balance to rations including bio-available chelated minerals and vitamins including the B-complex such as biotin along with essential amino acids (protein).*

**Formulated with a moderate caloric density and a reduced NSC.**

❖ *The level of sugar and starch in the formulation has been significantly reduced to maximize the positive effects of non NSC sources such as high quality fibres and fats while providing essential amino acids for growth and muscle repair.*

**Feeding rate is flexible according to the horse's requirements.**

*Different feeding rates are indicated to properly balance rations of all classes of horses including metabolically challenged horses.*

**Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.**

*The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.*

**Contains a full complement of B Vitamins and amino acids**

*Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids.*

All Phase 20 is formulated with carefully selected ingredients to ensure maximum palatability and consistency.

**Guaranteed Quality**

**Ultimate Performance**

**Industry Leading Research**

# All Phase 20 Description

All Phase 20 is a versatile pelleted supplement formulated to supply a complete nutritional balance including protein to rations not containing a recommended amount of a Brooks complete feed. All Phase 20 provides essential amino acids (protein), and a full complement of vitamins and highly available macro and trace minerals to ensure horses do not develop any long-term deficiencies of key nutrients. A reduced non-structural carbohydrate formulation (NSC) makes All Phase 20 an ideal choice to balance rations for metabolically challenged horses such as those diagnosed with Equine Metabolic Syndrome, Cushings, or laminitis where total calories (particularly from starch and sugar) must be limited. All Phase 20 may not provide sufficient calories for some metabolically challenged horses.

All Phase 20 is palatable whether fed alone or top-dressed on other feeds.

## Feeding Suggestions (Daily amounts)

The feeding rate of All Phase 20 is dependent on the type of horse fed. Where another source of minerals and vitamins is fed the amount of All Phase 20 can be reduced proportionately.

Mature Weight	880 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Maintenance	1.0 lb. (.45 kg.)	1.20 lbs. (.55 kg.)	1.4 lbs. (.65 kg.)
Light work	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1.0 kg.)
Broodmares			
Early gestation (1 <sup>st</sup> 8 months)	1.0 lbs. (.45 kg.)	1.2 lbs. (.55 kg.)	1.4 lbs. (.65 kg.)
Late Gestation (last 3 months)	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1 kg.)
Stallion			
Non breeding	1.0 lbs. (.45 kg.)	1.2 lbs. (.55 kg.)	1.40 lbs. (.65 kg.)
Breeding	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1.0 kg.)

All Phase 20 can be used as part of a ration for growing horses where less than the recommended rate of Phase I or Phase II is fed. Feed .25 (1/4) pound of All Phase 20 for each pound of Phase I or Phase II fed less than the recommended amount.

Do not exceed recommended amounts. Contact a Brooks representative for specific information.

*Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.*

Amount of feed required is dependent on the body condition, the metabolism and the type of activity that the horse is used for. For each pound of a Brooks complete ration fed daily reduce the amount of **All Phase 20** by .25 (1/4) pound. (.11 kg.) For specific recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
